

# Monitor my plot network

Observe. Analyze. Advise.

**"Agronomic Monitoring** enables me to juggle my field observations, weather forecasts and pressure conditions, and adapt my advice as best I can."

**Enrick**, *vineyard Advisor*

# THE ADVANTAGES THAT MAKE ALL THE DIFFERENCE

SAVE TIME  
DURING  
OBSERVATIONS

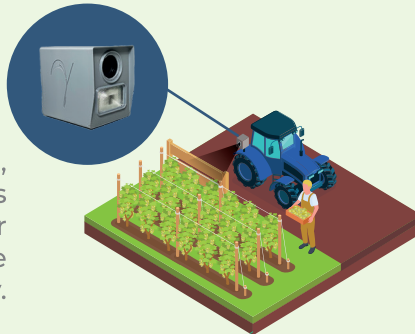

IMPROVE  
VINEYARD  
MONITORING

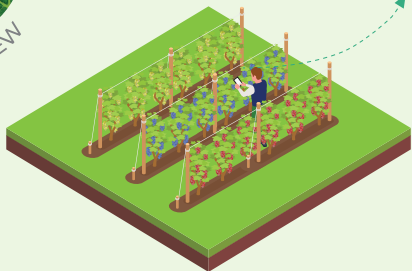

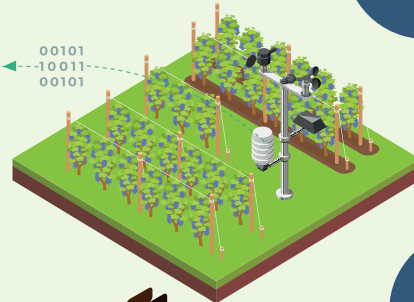

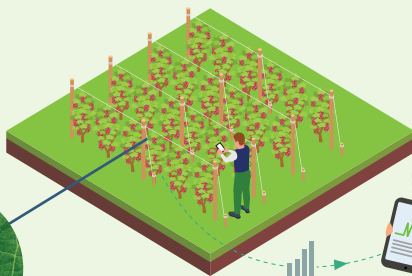

FACILITATE  
COMMUNICATION WITH  
WINEGROWERS

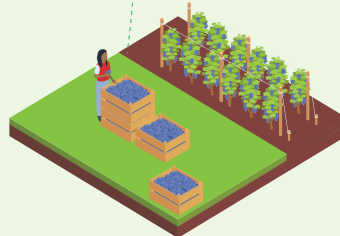

The **VineSpot** mobile application, dedicated to viticulture, saves you valuable time during your observations and eliminates the need for data re-entry.

The **VineCore** platform centralizes all your observations and sensor data into customizable dashboards.

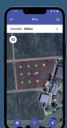

The *Experimentation* feature directly produces graphs comparing the different treatments in your trials.

**VineCore** automatically generates customizable reports (observations, weather, advice, photos, etc.) that can be shared with winegrowers in just one click.

## SOLUTIONS DESIGNED WITH YOU

**VineSpot**  
Mobile application  
for agronomic data  
collection

**VineCore**  
Web platform  
for data  
enhancement

**VineMapper (IA)**  
Sensor for real-time  
detection of vine  
anomalies
